

Mon June 30-86

I am sending a couple of pictures of plane No 297181 this was the first one of the 306<sup>th</sup> that completed 100 missions without turning back for a mechanical difficulty I think the one picture is Dick Buttorff crew that flew all three missions on my ~~ship~~ ship and the 100<sup>th</sup> one the other picture is the Engineering officer congratulating me on the 100 mission

I do not think  
There ever was any  
pictures of the 369<sup>th</sup>  
M.Sgt. Taken, or I would  
have one The picture  
enclosed I do not believe  
is even just 396<sup>th</sup> personal  
but 306<sup>th</sup> crew chiefs who  
had a plane make 100 missions  
I'm the only one who has  
strips or the only other 2  
I know are from the L.C.T. in  
The front row J. Fury &  
L. Foster,

Enclosed in a copy of my  
discharge as for when I  
got in the 306<sup>th</sup> it was the  
first of June in 42 when  
I finished school at Boeing  
Factory in Seattle.
